

Why won't your Prime Minister act to end the illegal imprisonment of this Australian citizen?

Two and a half years ago, Julian Assange completed his maximum 50 week sentence for 'skipping bail' in 2012. Had he not skipped bail, he almost certainly would have been imprisoned in solitary confinement for the rest of his life by the United States government for 'endangering US national security.' He supposedly endangered US national security by revealing, through Wikileaks, facts about US war crimes in Afghanistan, Libya, Syria and elsewhere. These revelations were supposedly in violation of the US 1917 Espionage Act, when he is not even a US citizen! Julian's imprisonment is in violation of UK law and the First Amendment to the US Constitution, which guarantees free speech. Why has Anthony Albanese failed to act to end this illegal imprisonment? Why has this never been debated in your national Parliament?
