Israeli snipers shot dead starving Palestinians seeking food and water, medical staff, hospital patients, UN staff, reporters, and their families

Palestinians seeking food & water under fire from snipers and Merkava tanks 29 February.

On 29 February, Israeli snipers and Merkava tanks opened fire on hungry Palestinians who had gathered to collect food. At least 112 were killed and hundreds more were wounded. Israel absurdly claimed 112 Palestinians, many with bullet holes in their heads, stampeded each other to death. This is part of Israel's ongoing effort, since 7 October 2023, to terrorise the 2.3 million Palestinian residents of the Gaza strip to flee for their lives across the border into the Sinai Peninsula and never be allowed to return. So far, over 31,341 Palestinians in Gaza are known to have been killed, 8,000 more are 'missing' beneath the rubble, and 73,134 more have been wounded. Many more face death due to starvation, thirst, and treatable diseases.

Amongst the dead are 132 journalists and media workers and members of their families and 142 members of the UNRWA (UN Relief and Works Agency). 70% of the buildings in Gaza have been destroyed or seriously damaged.

This monstrous act of genocide has rightly been condemned worldwide, with huge protests regularly in the global south and in the streets of Israel's allies, including the US, Britain, France, Germany and Australia. At the **UN General Assembly** of 12 December last year, 153 to 10 voted for an "immediate humanitarian ceasefire." 23 abstained. On 26 January, the **International Court of Justice** ruled that Israel take all measures within its power to prevent ... the killing, ... causing serious bodily or mental harm or deliberately inflicting ... conditions of life calculated to bring about [the] physical destruction of [the 2.3 million Palestinians in Gaza] or the [imposition] of

measures intended to prevent births [within that group]." Three times, since 7 October the **United Nations Security Council** voted 10 to 1, that Israel end its war in the Gaza Strip. By repeatedly using its veto power, the US alone prevented the UN from acting to end the killing.

Netanyahu's 'October 7' pretext for mass murder

Released 23 October, Yochevid Lifschitz thanks her Hamas captors for humane treatment in captivity

On 7 October, Palestinian Hamas resistance launched *Operation Al-Aqsa Flood* and overwhelmed IDF forces on and near the besieged Gaza strip borders. Almost 1,000 IDF were killed. Hamas also captured a number of civilians and military to use as hostages to exchange for Palestinian political prisoners.

The IDF forces had been sent there with orders to kill the Hamas 'terrorists' regardless of the consequences for their Israeli hostages. This is what caused nearly all of the Israeli civilian deaths on that day.

George Galloway, outspoken UK opponent of Israel's genocide, elected

On 29 February, UK voters in Rochdale, rebelled against this genocide by voting for George Galloway in a landslide against pro-war candidates from both the Labour and Conservative Parties. He is now using his voice in Parliament to hold to account the UK government for its complicity in this genocide. Galloway's huge grassroots support means that more like him will likely be elected at the forthcoming UK general election and could lead to a change of government and end UK support for genocide.

Why won't Australia act to make Israel end its killing in Gaza?

Australia still exports weapons and munitions to Israel and lets the US Pine Gap spy base assist the genocide. On 28 February in Parliament, Greens senators David Shoebridge and Jordon Steele-John showed that, contrary to Government denials, Australian weapons-parts exported to Israel enable Israeli F-35s to bomb Gaza civilians. When Parliament resumes on Tuesday 14 May, we hope these members will put to Parliament all the facts about Australia's complicity in this genocide and not, yet again, be cut short by a gag motion.

Yemen acts heroically and selflessly to end Israel's genocide

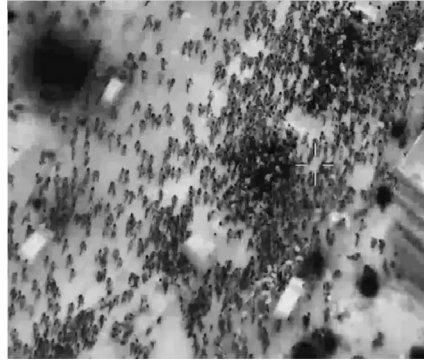

In the Red Sea, Yemeni armed forces have acted heroically to stop the transit of any ships to Israel. In spite of bombardment by the UK and the US, the people of Yemen remain defiant. Why can't Australia at least refuse to let Israeli ships dock here?
